

## Compliant Energy Performance of Buildings Certificates and better quality of the works — ground status, initiatives and perspectives

09:00 - 10:20 London, UK ▪ 10:00 - 11:20 Brussels, BE ▪ 11:00 - 12:20 Athens, GR

**REGISTER NOW** Participation to the Webinar is free. Register to receive the webinar link by email.

### Description

The Energy Performance of Buildings Directive recast gives ambitious goals for the building sector to reduce energy use as well as greenhouse gas emissions. It requires member states to engage in the generalisation of Nearly Zero-Energy Buildings and to set up the necessary actions to support the mandatory availability of Energy Performance Certificates (EPC), both for new and existing buildings.

The objectives of this webinar are:

- to show several issues on the quality of the EPC input data or the quality of the works that can be detrimental to achieve compliance in practice;
- to present preliminary results of field studies to evaluate initiatives addressing two of those issues.

### Programme (Brussels time)

10:00	QUALICheck's approach to quality and compliance ▪ <i>Peter Wouters, INIVE, Belgium</i>
10:15	Introducing an EPC after completion of the building works: reasons behind and preliminary lessons learnt in the Salzburg region of Austria ▪ <i>Susanne Geissler, ÖGNB, Austria</i>
10:30	Questions and answers
10:40	Compliance of heat transmission coefficients reported in EPCs in new houses in Cyprus ▪ <i>Marina Kyprianou Dracou, The Cyprus Institute, Cyprus</i>
10:55	Compliance to summer thermal comfort requirements: control of overheating in new Estonian apartment buildings ▪ <i>Jarek Kurnitski, Tallinn University of Technology, Estonia</i>
11:10	Questions and answers

### Cost and registration

Participation to the webinar is free, but requires you to register in advance. To register, please click on the “Register now” link above or visit [inive.webex.com](http://inive.webex.com) and click on Event Center / List of Events.

### Hardware and software

Our webinars are powered by WebEx Event Center. You will need an internet-connected computer running Windows or Mac OS, with a sound card and speakers. After registration you will receive a link to join the webinar. When the time comes, click on the link; WebEx will install the required application (Event Manager) and open the “conference room” for you. You can already setup and test your system by visiting [inive.webex.com](http://inive.webex.com) and clicking Set Up / Event Manager.
