

An event meant to shape the future

1st QUALICheck conference - Towards improved compliance and quality of the works for better performing buildings

Context for this conference...

The challenges to implement Nearly Zero-Energy Buildings (NZEB) and achieving minimum shares of Renewable Energy are tremendous. There are various indications raising concerns regarding the reliability of Energy Performance Certificate (EPC) declarations and the quality of the works. Achieving a significant improvement requires strong commitment from authorities and other major players, as well as sufficiently broad societal support.

Aims of this conference...

The first annual QUALICheck Conference aims to:

- identify issues in respect to existing procedures;
- highlight best practices for
 - ✓ easy access to reliable EPC input data;
 - ✓ delivery of improved quality of the works;
 - ✓ more effective compliance frameworks.

Topics of this conference...

- The overall scene regarding compliance and quality of the works.
- Lessons learned from major EU initiatives regarding reliability of input data and quality of the works.
- Experience from industry representatives: setting the market regarding reliability of input data and challenges regarding quality of the works.
- The QUALICheck action and networking perspectives.

Some of the speakers...

<i>Paul Hodson, DG Energy</i>	EU energy policy - status and challenges
<i>Vincent Berruto, EASME</i>	Intelligent Energy Europe building activities
<i>Eduardo Maldonado, Concerted Action EPBD</i>	EPBD challenges for Member States - 3 important directives
<i>Wina Roelens, Concerted Action EPBD</i>	Lessons from CA EPBD regarding compliance issues
<i>Zoe Wildiers, EASME</i>	Lessons learned from BUILD UP Skills
<i>Erik Van Acker, KBC bank</i>	Financing energy efficiency in buildings
<i>EURIMA</i>	Status and challenges for thermal insulation materials
<i>TIGHTVENT Europe - Platform on Building and Ductwork airtightness</i>	Status and challenges for building and ductwork airtightness
<i>EVIA - European Ventilation Industry association</i>	Status and challenges for ventilation systems
<i>Venticool - European platform on ventilative cooling</i>	Status and challenges for ventilative cooling
<i>EHPA - European Heat Pump Association</i>	Status and challenges for heat pumps and renewables
<i>ES-SO - European Solar Shading Organisation</i>	Status and challenges for shading devices
<i>Agoria</i>	Status and challenges for window profiles
	Status and challenges for post-insulation of cavity walls

Who should be interested in this event...

- ✓ European and national stakeholders organisations of the energy/construction sector
- ✓ National Authorities and Agencies involved in energy efficiency in buildings
- ✓ Corporations, SMEs and other organisations active in the energy/construction sector
- ✓ Building professionals interested in more reliable energy performance and high quality buildings

Registration and participation
