LEGAL NOTICE

Neither the Commission of the European Communities nor any person acting on behalf of the Commission is responsible for the use which might be made of the following information.

Published by Kluwer Academic Publishers,
P.O. Box 17, 3300 AA Dordrecht, The Netherlands.

Kluwer Academic Publishers incorporates the publishing programmes of
D. Reidel, Martinus Nijhoff, Dr W. Junk and MTP Press.

Sold and distributed in the U.S.A. and Canada
by Kluwer Academic Publishers,
101 Philip Drive, Norwell, MA 02061, U.S.A.

In all other countries, sold and distributed
by Kluwer Academic Publishers Group,
P.O. Box 322, 3300 AH Dordrecht, The Netherlands.

at the end of the book

Preface by Dr. Wolfgang Palz, CEC	xix
Introduction by Theo C. Steemers, CEC	xxi
Conference Sponsors / Conference Committee	xxiv
Steering Committee / Scientific Committee	xxv
Welcome address to SECA by Theo C. Steemers, CEC	xxvii
Welcome address to SECA by Dr. Hermann Scheer, Member of the German Parliament, President of EUROSOLAR	xxix

INTRODUCTORY PAPER

Design tools - Friend or enemy P.E. O'Sullivan, Univ. College London, UK	1
---	---

The papers which were not submitted for
publication are not listed hereunder

DAYLIGHTING

01.01 Daylighting in the U.S.: Trends in technology and design C.C. Benton, Univ. of California, Berkeley, USA	3
01.03 Quality - The crucial metric in daylight design C.M. Parry, The Welsh School of Architecture, UK	9
01.04 The scale of light - A new concept and its applica- tion S. Frandsen, School of Architecture, Copenhagen, Denmark	12
01.05 Daylighting in glazed atria G. Willbold-Lohr, Büro für energiegerechtes Bauen, Cologne, FR Germany	16
01.06 Simulation of light propagation applied to design of daylit buildings M. Fontoynt, B. Paule, ENTP, Vaulx en Velin, France	21
01.07 Solar architecture as an initiator for unconven- tional planning and daylighting techniques Y. Dean, M. Wilson, J. Walker, Polytechnic of North London, UK	24

CLIMATE AND URBAN DESIGN

02.01 Applicability of short reference years for passive solar building simulation P.A. Waide, Cranfield Inst. of Technology, Bedford, UK. B. Norton, Univ. of Ulster, N. Ireland, UK	27
02.05 Madrid's microclimates A. González Barrios, R.I. González Barrios, Madrid, Spain	30
02.06 Sound town planning B. Delage, Paris, France	33
02.12 Insolation in the built environment: Criteria for its normalization and regulation F.O.R. Pereira, J.A.C. Mincache, Univ. of Sheffield, UK	36

02.13	Les économies d'énergie dans le centre historique de Palerme A. Guli, L. Bellanca, S. Bertolino, A. Cammalleri, L. Crimi, M. Lo Iacono, M.L. Pino, F. Schilleci, Univ. de Palerme, Italy	39
02.15	Proposal for the planification and revitalization of rural areas M. Luxan, R. Tendero, I. Villota, Univ. Politecnica, Madrid, Spain	42
02.17	The computer programme "Gosol", an instrument to increase passive solar energy use in urban planning P. Goretzki, Univ. Stuttgart, FR Germany	45
02.19	Town development by planning and advice on the spot R. Hytrek, Flörsheim/Main, FR Germany	48
02.25	Low energy ecological settlements (LEES) J. Behnsen, Univ. of Oldenburg, FR Germany. N. Baker, Univ. of Cambridge, UK. J. Rosemann, Technical Univ. of Delft, The Netherlands	51
02.26	The Building, the urban space, the site and the environment in the area of Cergy-Pontoise: A global conception method J. Bouillot, Paris, France	54
02.28	Optimisation of urban layout with respect to solar irradiation R.J. Peckham, CEC/JRC, Ispra, Italy. E.J. Keeble, Building Research Establishment, Garston, UK	57
02.29	Le logiciel de gestion des énergies Energie-Territoria D. Rahal, M. Miramond, Inst. Nat. des Sciences Appliquées de Lyon, France. B. Aulagne, Gaz de France. J. Grillot, Paris, France	60
02.30	The evaluation of urban infrastructures in the planification of urban networks B. Saugy, R. Groux, J.C. Hadorn, J.M. Revaz, CREM, Martigny, Switzerland	63
02.31	A modelised management of machine transformation F. Feuillie, Uzès, France	66
02.32	Bioclimatic urban design in Andalucia J. López de Asiain, A.L. Ballesteros Rodriguez, J.M. Cabeza Lainez, J. Pérez de Lama, Escuela Sup. de Arquitectura, Seville, Spain	69
02.37	Climatic study of the old town in Nice C. Petitcollot, Vence, France E. Rauzier, Biot, France	72
02.39	Energy use and urban development - Urban blocks analysis K. Steemers, N. Baker, D. Hawkes, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	75
<u>COMFORT IN THE BUILT ENVIRONMENT</u>		
03.01	Comfort in urban space of Southern Europe J. López de Asiain, Escuela Sup. de Arquitectura, Seville, Spain	78
03.02	Climatic and cultural preferences in window design K.A. Tabet, S. Sharples, Univ. of Sheffield, UK	82
03.03	The glazing: A challenge for thermal and visual comfort C. Aghemo, S. Biava, M. Filippi, Politecnico di Torino, Italy	86
03.04	Comfort studies by spatial thermal modelling of a direct gain room N.V. Baker, G.R. Newsham, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	91

03.05	Analysis of comfort level in Italian bioclimatic buildings P. Oliaro, V. Corrado, Politecnico di Torino, Italy	95
03.06	Field Studies of thermal comfort in passive solar buildings I.D. Griffiths, Univ. of Surrey, UK	99
<u>DESIGNING FOR HOT AND ARID CLIMATE</u>		
04.01	Passive cooling - State of the art M. Antinucci, Conphoebus Italy. B. Fleury, ENTPE, France. J. López de Asiain, Univ. of Seville, Spain. E. Maldonado, Univ. of Porto, Portugal. M. Santamouris, Protechna, Greece. A. Tombazis, Meletitiki, Greece. S. Yannas, Arch. Assoc., UK	103
04.02	Evaporative cooling for summer comfort in office buildings J.R. Millet, E. Hutter, CSTB Paris, France. P. Picard, Gaz de France, La Plaine St-Denis, France	108
04.03	Controlled ventilation as a cooling agent in school design for arid tropical areas O.M.A. Khafaji, King Abdulaziz Univ., Jeddah, Saudi Arabia. K.H. Murta, Univ. of Sheffield, UK	111
04.04	Overheating in bioclimatic architecture in Mediterranean climates J.A. Cusido, J. Jorge, J. Puigdomènech, Dept. de Meteorologia i Ciència del Sòl, Terrassa, Spain. J.J. Escobar, J. Esteve, A. Mitjà, C. Torra, Generalitat de Catalunya, Barcelona, Spain	115
<u>VENTILATION</u>		
05.01	New ventilation concepts with respect to indoor air quality and energy conservation P. Wouters, Belgian Bldg. Research Inst., Limelette, Belgium	119
05.03	Thermal performance of non-air-conditioned offices in the UK D.K. Alexander, P.J. Jones, Univ. of Wales, UK	126
05.04	Design of ventilation systems in residential buildings D. Bienfait, CSTB Marne la Vallée, France	130
05.05	Mapping indoor air movements with a tracer-gas technique C.F.A. Afonso, E.A.B. Maldonado, Univ. of Porto, Portugal	134
05.06	Simulation of natural ventilation in buildings by means of fluid flows applied to the case of crown and county courts P.F. Linden, G.F. Lane-Serf, Univ. of Cambridge, UK. F. Penz, The Martin Centre of Architecture and Urban Studies, Cambridge, UK	138
05.07	An investigation into the ventilation and thermal performance of contemporary housing in North Africa M.B.Gadi, I.C. Ward, Univ. of Sheffield, UK	143
<u>VISUAL, THERMAL AND ACOUSTIC COMFORT</u>		
06.03	Dynamic characterization of daylighted spaces L. Cantarino de Carvalho, Lab. Nacional de Engenharia Civil, Lisboa, Portugal	147
06.06	The role of daylight in industrial buildings P.A. Ruysevelt, W.B. Gillett, R.R. Cohen, Halcrow Gilbert Associates, Swindon. I. McCubbin, Harwell Lab., Oxfordshire, UK	150
06.07	Fluorescent material - Technical improvements for a new measuring device F.W. Grimme, KFA Jülich, FR Germany. F. Rostock, Cologne, FR Germany. V. Wittwer, Fraunhofer Inst. ISE, Freiburg, FR Germany	153

06.09	Low cost instrument for measuring daylight factor in models N. Baker, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	155
06.10	A personal dosimetry device to measure light exposure N.V. Baker, D.A. Cawthorne, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	159
06.11	Experiences with simplified design tools for daylighting and thermal design N.V. Baker, The Martin Centre for Architectural and Urban Studies, Cambridge, UK. M. Fontoynt, LASH, Lyons, France	161
06.12	Simplified graphical-numerical method for determining daylight illuminances A. Fanchiotti, Univ. of Rome La Sapienza, Italy. M. Vio, Ist. Univ. di Architettura di Venezia, Italy	165
06.13	Climate and daylighting for conserving F. Salvi, Genio Civile of Catania, Italy	168
06.16	Evaluation of daylighting and thermal performance of buildings V. Dingeldein, I. Lütkemeyer, Techn. Univ. Berlin, FR Germany	171
06.18	New daylighting components: A sun-duct in building retrofiting X. Solsona, C. Badinier, H. Coch, Esc. Tecnica Sup. d'Arquitectura de Barcelona, Spain	174
06.19	Daylighting and thermal performance of shed coverings faced south in buildings A. Mingozzi, Univ. of Bologna, Italy	177
06.20	Architecture en fête J. Deval, Ecole d'Architecture de Lyon, France	180
06.22	Economy of transparent insulation materials through thermal comfort, daylighting performance, and energy saving W.S. Wilke, Fraunhofer Inst. ISE, Freiburg, FR Germany	183
06.24	A study of daylight availability in Athens, Greece G.N. Fatseas, Univ. College London, UK	186
06.25	Condensation targeter T. Oreszczyn, Univ. College London, UK. D. Boyd, School of Architecture, Birmingham Polytechnic, UK. P. Barr, Birmingham, UK	189
06.27	Computer model for predicting man's thermal behaviour L. Imre, A. Bitai, C.D. Horváth, L. Bánhidi, Techn. Univ. Budapest, Hungary	192
06.28	A comprehensive model of the environmental performance of buildings A. Giacccone, CNR-IEREN, Palermo, Italy	195
06.29	A study on the comfort levels in a room of an experimental building situated in a composite tropical climate M. Srinivasa Reddy, S. Krishnamoorthy, Indian Inst. of Technology, New Delhi, India	198
06.32	A study into climatic, luminic and acoustic comfort in the architecture R. Serra, H. Coch, Esc. Tecnica Sup. d'Arquitectura de Barcelona, Spain	201
06.34	How can science help the architect to estimate indoor comfort conditions to be obtained passively within a building at the project stage P. Achard, A. Ayoob, M. Tantot, Ecole des Mines de Paris, Valbonne, France	203

06.37	Implications de la question du confort sur la conception architecturale M. Retbi, MELTM/DAU, G. Olive, BEGO, L. Adolphe, ENTPE/GISE, France	207
06.40	Passive cooling analysis to a holiday complex in Iraklion Crete M. Kopidakis, Iraklion, Greece. E. Athanassakos, Koropi, Greece C. Theofylactos, Athens, Greece	210
06.42	Climatic building design measures for human comfort and energy conservation in Kuwait S.A.A. Al-Awadhi, A.A.M. Sayigh, Univ. of Reading, UK	213
06.43	Air motion and comfort as a design aid J.P.B. Nathan, Jerusalem, Israel. H. Wu, Arizona State Univ., Tempe, Arizona, USA	217
06.45	New criteria for defining comfort in buildings V. Corrado, P. Oliaro, Politecnico di Torino, Italy	220
06.46	Conception of a third generation thermal manikin L. Imre, A. Bitai, C.D. Horváth, P. Niedermayer, L. Bánhidi, Technical Univ. Budapest, Hungary	224
06.47	Active or passive acoustics for auditoria? A preliminary survey G. Dodd, Auckland Univ., New Zealand	227
06.51	Acoustical poetry in architecture F. Daumal, Escola Tècnica Sup. d'Arquitectura de Barcelona, Spain	230
06.52	Ministry of Housing, physical planning and environment in the Hague - A transparent Ministry J. Hoogstad, Rotterdam, The Netherlands	232
<u>TRANSPARENT INSULATION</u>		
07.01	Transparent insulation - A new solar energy component A. Goetzberger, Fraunhofer Inst. ISE, Freiburg, FR Germany	234
07.02	Improvements on solar aperture F.W. Grimme, KFA Jülich, FR Germany	239
07.03	New concepts for daylighting and heating of buildings J. Schmid, W.S. Wilke, F. Sick, Fraunhofer Inst. ISE, Freiburg, FR Germany	243
07.04	Wall heating with transparent insulation - Results from realized demonstration projects W. Stahl, E. Bollin, J. Schmid, J. Vahldiek, K. Voss, A. Wagner, Fraunhofer Inst. ISE, Freiburg, FR Germany	247
07.05	Transparent insulation: Design recommendations, sensitivity studies, shading and materials ageing K. Wellinger, B. Schläpfer, P. Schneider, E. Schweizer AG, Hedingen, Switzerland	251
<u>MATERIALS AND COMPONENTS</u>		
08.01	The thermal envelope - An integrated part of the heating system? B. Saxhof, Technical Univ. of Denmark	254
08.02	Innovative solar components for office buildings G. Scudo, Politecnico di Milano, Italy. S. Fumagalli, G. Rizzi, ENEA-FARE, Ispra, Italy	260
08.03	Glass coating: Advanced technology for high performances A. Minne, Glaceries de Saint-Roch, Brussels, Belgium	263

08.04	The performance of external shading devices - Integrating shading and daylighting K. Steemers, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	266
<u>URBAN PLANNING AND URBAN DESIGN</u>		
09.01	Controlling energy use through urban planning P. Steadman, The Open Univ., Milton Keynes, UK	270
09.02	Un système intelligent pour la gestion des règlements d'urbanisme A. Dupagne, Univ. of Liège, Belgium	278
09.04	Parametric energy modelling for urban situations K. Steemers, N. Baker, D. Hawkes, The Martin Centre for Architectural and Urban Studies, Cambridge, UK	282
09.05	Solar potential of regular gridiron urban environ- ments in Western Argentina M. A. Atencio, C. de Rosa, A. Esteves, M. Basso, J.L. Corgetoso, Lab. de Ambiente Humano y Vivienda, Mendoza, Argentina	286
<u>SOLAR SYSTEMS</u>		
10.01	Expérience de stockage intersaisonnier solaire en maisons individuelles H. Mouette, Marcoussis, France	290
10.02	Natural ventilation in courtyard and atrium buildings R. Bensalem, S. Sharples, Univ. of Sheffield, UK	293
10.03	Experimental analysis of the energy performance of a passive attached sunspace I. Meroni, F. Scamoni, P. Tirloni, C. Pollastro, R. Lacci, Inst. of Building Technology, Milan, Italy	296
10.04	Plancher solaire direct - Un succès thermique et architectural P. Papillon, Univ. de Savoie, Chambéry, France	300
10.05	The use of thermal storage to conserve energy for cooling buildings J.A. Sabbagh, King Abdulaziz Univ., Jeddah, Saudi Arabia	303
10.07	Calibration of the Spanish solar test cells M.R. Heras, F.M. Tellez, M. Perez, IER-CIEMAT, Madrid, Spain. G. de Ignacio, E.U. de Arquitectura Técnica de Madrid, Spain	307
10.08	Specification, construction and instrumentation of the Spanish solar test cells M.R. Heras, F.M. Tellez, M. Perez, IER-CIEMAT, Madrid, Spain. G. de Ignacio, E.U. de Arquitectura Técnica de Madrid, Spain	310
10.09	Climate responsive cladding elements G. Scudo, Politecnico di Milano, Italy. P. De Pascali, Istituto Cooperativo per l'innovazione, Roma, Italy	313
10.10	PASSYS solar testing and performance prediction H.A.L. van Dijk, TNO Inst. of Applied Physics, Delft, The Netherlands	316
10.15	Air flow windows F. Bonvehí, Barcelona. X. Traver, M. Miró, Ecotècnia, Barcelona, Spain. A. Trias, Torrelles de Llobregat, Spain	319
10.16	Solar facade integrated with a H.V.A.C. system G. Rossi, Ist. Univ. di Architettura, Venezia, Italy. G. Solaini, Politecnico di Milano, Italy	322

10.19	Integrated bioclimatic design of a rural daycare center in Greece E.S. Triantis, Univ. of Ioannina. M. Santamouris, T. Argyriou, M. Vallindras, Protechna, Athens, Greece	325
10.20	Thermal performance of passive solar systems in massive test cells H. Gonçalves, LNETI-DER, Lisboa, Portugal. E. de Oliveira Fernandes, FEUP-UP, Porto, Portugal	328
10.23	Optimum thickness of non-homogeneous rotating wall elements for environmental control A.C. Pitts, J.J. McDonald, Univ. of Sheffield, UK	331
10.24	Constructional and architectural aspects of facades using transparent insulation materials A. Lohr, B.C. Alexa, Büro für energiegerechtes Bauen, Cologne, FR Germany. B. Weidlich, A. Kerschberger, Assmann Ingenieures., Dortmund, FR Germany	334
10.25	Renovation of a one-family house with transparent insulation A. Wagner, Fraunhofer Inst. ISE, Freiburg, FR Germany	337
10.26	Simulation tools for prediction of the thermal behaviour of transparently insulated buildings P. Sick, W.S. Wilke, J.P. Kummer, Fraunhofer Inst. ISE, Freiburg, FR Germany	340
10.28	Atria and conservatories in primary schools; an illustrative analysis of the effect of varying atrium width B. Norton, Univ. of Ulster. D.J. Harris, S.N.G. Lo, P. Waterfield, P.C. Grindley, Cranfield Inst. of Technology, Bedford, UK. R.A. Hobday, Databuild, Birmingham, UK	343
<u>EVALUATING SOLAR SYSTEMS</u>		
11.01	Conflicts between physics and architecture in solar systems optimization F.M. Butera, Univ. di Palermo, Italy	346
11.02	Integration of solar thermal systems in buildings E. Aranovitch, H. Bloehm, R. Colombo, D. Gilliaert, P. Tebaldi, CEC/JRC, Ispra, Italy	353
11.03	Simplified methods for the sizing of active solar systems J. Adnot, L. Kadi, B. Peupartier, Centre d'Energétique-EMP, Paris, France. B. Bourges, St-Grégoire, France	357
11.04	Optimisation of the heat balance of an attached sunspace J.B. Gay, Ecole Polytechnique Fédérale de Lausanne, Switzerland	359
11.05	Passive solar roofspace systems: extrapolations from a years monitoring P. Tindale, J. Littler, Polytechnic of Central London, UK	362
11.06	House design studies A.J. Howrie, J.M. Palmer, A. Hildon, Databuild, Birmingham, UK	366
<u>PERFORMANCE OF SOLAR BUILDINGS</u>		
12.01	The performance and general success of passive solar buildings throughout Europe S. Burton, J. Doggart, A. Crompton, ECD Partnership, London, UK	369
12.02	Control of passive solar system - State of the art A.H.C. van Paassen, Delft Univ. of Technology, The Netherlands	376

12.03	Le plancher solaire direct T. Cabirol, Aix en Provence, France. A. Jean, Chambery, France. A. Liébard, Comité d'Action pour le Solaire, Paris, France	380
12.04	Stratégies thermiques et usages de l'habitat: La véranda N. Haumont, Centre de Recherche sur l'Habitat, Paris, France	383
<u>CEC PROJECT PASSYS</u>		
13.01	The CEC project PASSYS: Achievements in the period 1986-1989 R. Gicquel, C. Cools, Ecole des Mines de Paris, Valbonne, France	387
13.02	The PASSYS test cells: A unique European network of high quality outdoor test facilities for thermal building research P. Wouters, L. Vandaele, Belgian Bldg. Research Institute, Limelette, Belgium	392
13.03	PASSYS: Towards a uniform European testmethod for passive solar systems H.A.L. van Dijk, TNO Inst. of Applied Physics, Delft, The Netherlands. M. Antinucci, Conphoebus, Catania, Italy	396
13.04	Performance assessment of sun-shading components for Mediterranean buildings F. Aleo, M. Antinucci, P. Carbonaro, Conphoebus, Catania, Italy	399
13.05	The model validation activities of project PASSYS J.A. Clarke, Univ. of Strathclyde, UK	403
13.06	Development of simplified design tools for passive solar systems within the CEC concerted action PASSYS L. Bourdeau, CSTB Valbonne, France	407
<u>THERMAL PERFORMANCE</u>		
14.01	Professional energies: Putting science into practice E. Shove, Univ. of York, UK	410
14.02	Analyse comparative de modèles pour l'évaluation des performances énergétiques des bâtiments sur site V. Richalet, ENTPE, Vaulx en Velin. F. Flouquet, CNRS/CRTBT, Grenoble, France	413
14.03	Thermal performance of passive buildings modelling and simulation in the S3PAS computer program S. Alvarez, E.A. Rodríguez, R. Velazquez, E.S. Ingenieros Industriales, Seville, Spain	416
14.04	The energy performance assessment project and some early findings A. Hildon, J. Palmer, A. Seager, J. Brown, Data- build, Birmingham, UK. D. Alexander, N. Vaughan, H. Jenkins, The Welsh School of Architecture, UK P. O'Sullivan, Univ. College London, UK	419
14.05	Proposal for the extension of the NBE-CT-79 M.R. Heras, G. de Ignacio, IER-CIEMAT, Madrid, Spain. R. Serra et al, ETS Arquitectura de Barcelona, Spain. S. Alvarez et al, ETSI Indus- triales de Sevilla, Spain	423
14.06	Comparative study of passive solar systems performance M.R. Heras, J. Marco, F.M. Tellez, IER-CIEMAT, Madrid, Spain	426
14.07	Comparative study of two passive solar buildings M.R. Heras, J. Marco, F.M. Tellez, IER-CIEMAT, Madrid, Spain	429

14.08	The influence of glassing shape on building thermal performance	432
	J.C. Klainsek, ETS de Arquitectura, Madrid, Spain	
14.09	The effect of different types of glassing on the thermal performance of non-residential buildings	435
	J.C. Klainsek, ETS de Arquitectura, Madrid, Spain	
14.10	The airtightness of roller blind boxes	438
	A. Rangel das Neves, V. Abrantes, Univ. of Porto, Portugal	
14.11	The fit method for estimating the heating requirements of buildings with direct gain passive solar systems	441
	A.C. Oliveira, E. de Oliveira Fernandes, Univ. of Porto, Portugal	
14.12	Spanish vernacular architecture: Analysis from the bioclimatic point of view	444
	M.R. Heras, J.L. Montesinos, IER-CIEMAT, Madrid, Spain	
14.13	Spanish program on bioclimatic architecture: IER-CIEMAT strategies	447
	M.R. Heras, IER-CIEMAT, Madrid, Spain	
14.14	Typology energy simulation in Spanish vernacular architecture	450
	M.R. Heras, J.L. Montesinos, IER-CIEMAT, Madrid, Spain	
14.15	Comparison of measured and regressed performance characteristics and simulations of a passive solar house	453
	P. Robinson, J. Littler, Polytechnic of Central London, UK	
14.18	TICAD 2: A computer aided design tool for assessing the thermal performance of buildings equipped with transparent insulation	456
	L.F. Jesch, S. Gilani, Univ. of Birmingham, UK	
14.19	La prise en compte des apports solaires dans la réglementation thermique française des bâtiments autres que d'habitation	459
	J.R. Millet, E. Hutter, CSTB Paris, France	
14.21	Energy and user studies of a passive solar school in the UK	462
	N.V. Baker, The Martin Centre for Architectural and Urban Studies, Cambridge, UK. C. Martin, The Energy Monitoring Co., Newport Pagnal, UK	
14.22	Chainage entre le logiciel de DAO/CAO Architrion et la méthode d'évaluation énergétique HyperMege, dans le cadre du programme PEBI	467
	L. Adolphe (GISE/ENTPE). P. Brejon (EMP) ENPC/CERMA, Noisy le Grand, France	
14.23	The influence of the thermal mass on the thermal performance of buildings in summer and winter	470
	E. Shaviv, Technion-Israel Inst. of Technology, Haifa, Israel	
14.24	The use of simulation models in the schematic design stage for the design of energy conscious buildings	473
	E. Shaviv, Technion-Israel Inst. of Technology, Haifa, Israel	
14.27	Contribution to building climatization given by a glazed component	476
	G. Rossi, Ist. Univ. di Architettura, Venezia, Italy. G. Solaini, Politecnico di Milano, Italy	
14.29	Appropriate energy technology for the domestic sector - Case study in rural Scotland	479
	H.M. Edge, School of Surveying, Aberdeen, UK. G.S. Saluja, Univ. of Ulster at Jordanstown, UK	

14.31	Development and testing of a low thermal conductivity mortar J.A. Tinker, Leeds Univ., UK. A. O'Rourke, Nottingham Polytechnic, UK	482
14.32	Parametric analysis of building heating consumption in Italy V. Corrado, P. Oliaro, Politecnico di Torino, Italy	486
14.34	Why integral design of building and systems? J.L.M. Hensen, Eindhoven Univ. of Technology, The Netherlands	490
14.35	Comparison of the international thermal protection claims K.W. Usemann, Univ. of Kaiserslautern, FR Germany	493
14.36	Comprehensive energy targeting and compliance system, based on affordable warmth, for a major housing association using computer applications S. Burton, J. Doggart, ECD Partnership, London, UK	496
14.37	Energy audit assessment on office buildings stock: Methodology and first results M. Brocato, S. Sciuto, Conphoebus, Catania, Italy. F. Parrini, R. Viadana, ENEL-CRTN, Milan, Italy	499
14.40	Climatic data for the design of solar buildings: results and final products of the "Eufrat" project B. Bourges, Rennes, France. M.J. Carvalho, LNETI, Portugal. M. Cherrey, Armines, France. M. Petrakis Athens, Greece. C. Armenta, Univ. of Madrid, Spain. V. Ruiz, F. Frutos, ETSII Seville, Spain. J.M. Caridad, ETSIA Cordoba, Spain	502
14.42	TICAD 3: A PC based architectural design tool using a Lotus spreadsheet for energy assessment of buildings L.F. Jesch, A.S. Minas, Franklin Co. Consultants, Birmingham, UK	505
14.44	Presentation of CIBAO: a new approach for integrated computer-aided design systems for the building activities A.M. Dubois, CSTB Valbonne, France	507
14.45	Energy saving in building by optimization of control strategies. Design using simulation analysis V. Benoit, CSTB Valbonne, France	511
14.47	Conception architectural et bilan thermique: un didacticiel pour la maîtrise des paramètres énergétiques lors de la conception d'un bâtiment L. Adolphe, GISE/EMP. D. Campana, Dialogic, France	514
<u>ARCHITECTURE, ENERGY + EDUCATION</u>		
15.01	Smart glazing and its effects on passive solar design J. Littler, Polytechnic of Central London, UK	517
15.02	Architecture, renewable energy and the global ecological crisis J. Page, Univ. of Sheffield, UK	523
15.03	Ideology and information in low energy design L. Kealy, J.O. Lewis, Univ. College Dublin, Ireland	527
15.04	Formation par ordinateur: pour une analyse européenne des besoins J. Adnot, Ecole des Mines de Paris, France. A. Duport, J.G. Sender, AFME, Paris, France	531
15.05	The contribution of appropriate energy design strategies and appraisal of a tourist residence complex in Crete P. Koronakis, TEI Piraeus, Athens, Greece. Y. Kalligeris, Hania, Greece. M. Santamouris, Protechna, Athens, Greece	534

15.06	Energy-efficient building design: A handbook for European architects	538
17.45	J. Goulding, J.O. Lewis, Univ. College Dublin, Ireland	
	<u>DESIGN SUPPORT</u>	
16.01	L'image comme outil de design	541
	J. Zeitoun, CIMA, Paris, France	
16.02	Passive solar heating and energy efficient housing design	548
	S. Yannas, Architectural Ass. School of Architecture, London, UK	
16.03	Development of pilot expert system as an integrated design tool for the design of passive solar commercial buildings	557
	O.C. Morck, Cenergia, Malov, Denmark	
16.04	Applicability study 1: A UK initiative to determine the error characteristics of detailed thermal simulation models	559
	K.J. Lomas, F. Parand, Leicester Polytechnic, UK. D.P. Bloomfield, A. Pinney, Building Research Establishment, Garston, UK	
	<u>EDUCATION AND REALISATIONS</u>	
17.02	Energy in architecture: EC activities in support of the building design process	564
	J.O. Lewis, S. O'Toole, Univ. College Dublin, Ireland	
17.03	Case studies in passive solar design: Bringing the good news or comforting the faithful	567
	L. Kealy, Univ. College Dublin, Ireland	
17.04	New tools, new rules: Potentials and constraints	570
	R. Beheshti, Delft Univ. of Technology, The Netherlands	
17.05	Energy saving in the student's living quarters Stuttgart-Hohenheim	573
	P.O. Braun, J. Schmid, E. Gruber, Fraunhofer Inst. ISE, Freiburg, FR Germany	
17.06	Monitoring results of passive solar sheltered housing	576
	D. Clarke, London, UK	
17.07	Premier prix de la première compétition nationale des idées sur habitation en bois	579
	R. Tendero, C. Garcia de Viedma, Madrid, Spain	
17.09	Solar village No 3 - Lykovryssi Athens	582
	A.N. Tombazis, Athens, Greece	
17.10	Thermal and visual study of a hotel complex using passive cooling components	585
	A.N. Tombazis, Meletiki, Athens, Greece. A. Argyriou, M. Santamouris, Protechna, Athens, Greece	
17.11	Passive solar design of green park combined school	588
	B. Norton, Univ. of Ulster. J.R.R. Wagge, Aylesbury, UK. D. Newton, Yard, London, UK	
17.12	A bioclimatic school in Venice	591
	C. Cappai, A. Venturini, Univ. of Venice, Italy	
17.13	Thermal performance of vernacular excavated living space in the Mediterranean zone (Valencia, Spain). Architectural criteria derived from its analysis	594
	V. Sifre, F. Aranda, V. Blanca, Valencia, Spain	

17.14	Project for a school in Venice-Mestre M. Tassoni, A. Dondi, N. Bonati, Ist. Univ. Archi- tettura Venezia, Italy	597
17.15	Thermal performance of 90 passive solar family houses in Birmingham, UK: Implications for design and marketing L.F. Jesch, Franklin Co. Consultants, Birmingham, UK	600
17.16	Development of the concept for solar energy exploi- tation illustrated by an example of a building design M. Dragovic, Univ. of Split, Yugoslavia	603
17.19	Le Corbusier's contribution in climatic architecture J.J.P. Michel, Neuilly-sur-Seine, France	606
17.20	Le solaire passif en France - Etat de l'art - Axes de recherche E. Durand, AFME, Sophia Antipolis, France	609
17.22	A microclimatical sunspace - Utilization and thermal benefit I. Lütkemeyer, C. Hartmann, Techn. Univ. Berlin, FR Germany	612
17.23	Thermal performances of two low-energy multistory residential buildings J.P. Eggimann, J.B. Gay, Ecole Polytechnique Fédé- rale de Lausanne, Switzerland	615
17.24	One year experience with a solar house with transparent wall insulation (TWI) E. Bollin, Fraunhofer Inst. ISE, Freiburg, FR Germany	618
17.25	Storey and glass roof addition to an architectural office F. Lichtblau et al, Munich, FR Germany	621
17.28	Energy conscious multi-apartment residential houses in Florence A. Gioli, A. Corsi, P. Puccetti, M. Sala, A. Toti, Fac. di Architettura, Florence, Italy	624
17.29	The Elisa Lemonnier bioclimatic school G. Gaudin, Reze, France	627
17.30	Design for energy efficiency: A case study - Govern- ment offices at Wollongong, New South Wales D.M. Rowe, Public Works Dept., Sydney, Australia	630
17.32	66 second generation sunspace houses in The Nether- lands J.M. Boonstra, M. de Langen, Woon/Energie, Gouda, The Netherlands. T.H. Reijenga (BEAR) Gouda, The Netherlands	633
17.34	Polyfunctional gymnasium in Bronzolo (Italy - South Tyrol) R. Zuretti, Bronzolo, Italy	636
17.37	Building system in concrete blockwork - Design, construction and performance J.I. de Llorens i Duran, A. Soldevila i Barbosa, School of Architecture, Barcelona, Spain	639
17.39	Some low energy building design considerations for Malta J.M. Cachia, Univ. of Malta	642
17.40	Architectural implications in intelligent buildings A. Filloux, M. Rubinstein, CSTB Valbonne, France	645
17.44	How encourage the teaching of passive solar and low energy design A. De Herde et al, Univ. Catholique de Louvain, Belgium. S. Yannas, Architectural Association School of Architecture, London, UK	648

Late news paper

17.45 Dwellings of low cost of maintenance in-Castilla - 650
La Mancha
S. Hernández Marculeta, Consejería de Política
Territorial, Cuenca, Spain

APPENDIX

Papers in association with the exhibitions

"Working in the City" - European communities archi- 655
tectural ideas competition
S. O'Toole, J.O. Lewis, Univ. College Dublin, Ireland

Integrated utilization of passive solar energy and 658
natural daylighting in an office
P.E. Kristensen, Esbensen, Copenhagen Denmark

Concours "Working in the City" 662
J.P. Conan, Paris, France

Building 2000, a pilot project of the Commission's 665
non nuclear energy R&D programme solar energy appli-
cations to buildings
C. den Ouden, EGM Engineering, Dordrecht, The Nether-
lands

ALPHABETICAL LIST OF AUTHORS 669
