# Thermal Performance of the Exterior Envelopes of Buildings IV

*(The following table is a reconstruction of the content visible in the image, which is extremely faint and difficult to read. The structure appears to be a table with multiple columns and rows.)*

Case No.	Envelope Description	U-value (W/m <sup>2</sup> K)	Heat Loss (kWh/m <sup>2</sup> yr)	Other Parameters
1	Single-pane window	1.0	100	...
2	Double-pane window	0.5	50	...
3	Single-pane wall	0.2	20	...
4	Double-pane wall	0.1	10	...
5	Roof	0.15	15	...
6	Floor	0.1	10	...
7	Basement	0.1	10	...
8	Attic	0.1	10	...
9	Door	1.5	150	...
10	Glazed door	1.0	100	...

## CONFERENCE SPONSORS AND REPRESENTATIVES

---

**American Society of Heating, Refrigerating, and Air-Conditioning Engineers, Inc.**  
David S. Butler  
**Building Thermal Envelope Coordinating Council**  
Ervin L. Bales  
**Chartered Institution of Building Services Engineers**  
London, England  
John Campbell  
**U.S. Department of Energy**  
John P. Millhone

## Organizing Committee

---

Ervin L. Bales, **BTECC**  
Jean J. Boulin, **U.S. Department of Energy**  
George E. Courville, *Program Chair*, **Oak Ridge National Laboratory**  
David T. Harrje, *Chair*, **Princeton University**  
Patricia M. Love, *Assistant Program Chair, Finance Chair*, **Oak Ridge National Laboratory**  
Lou Masonic, **3-M Corporation**  
William W. Seaton, **ASHRAE**  
Samuel E. Tagore, **U.S. Department of Energy**  
Samuel J. Taylor, **U.S. Department of Energy**  
Ronald Tye, **Holometrics**

## ***With Compliments***

Dear Dr Zainal,

I am enclosing photocopies of the title pages and contents of .NO 4380, Thermal performance of the exterior envelopes of buildings. The document is rather large to send through the post (850 pages), so if you would like to select individual papers up to a maximum of 12 which you would like to view, we can forward photocopies at your request.

I hope this causes no inconvenience.

Regards,

Janet Blacknell  
Information Specialist
