ABSTRACT Five supplementary papers from the sixth AIVC Conference as follows: The performance of ventilation in an untight house; Influence of open windows on the interzone air movement within a semi-detached dwelling; Interpretation and error analysis of multi-tracer gas measurements to determine air movement in a house; Inhabitant's behaviour with regard to ventilation. A report of the work of Annex VIII; A multi-tracer system for measuring ventilation rates and ventilation efficiencies in large mechanically-ventilated buildings.

KEYWORDS ventilation strategy, measurement technique
