

FEEDBACK FROM MONITORING

Provide air transfer and effective transfer of premises

• Management by occupants of manually operated openings (windows and doors)

· Air transfer grilles and acoustics isolation of premises

Caution for undersizing

- · Lack of stack effect and drivng forces for natural ventilation
- Excessive pressure losses in mechanical ventilation
- Undersized ground-coupled heat exchanger, to be designed for summer ventilative cooling air-flow rates.

Degradation of buildings thermal performances

Infiltration occurances in air inlet or exhaust when ventilative cooling is off

FREEVSNT

Creation of thermal bridges
